

Technical Architecture

Date	31 October 2023
Team id	6D4BEFABCF29086980146B64642C0BD8
Project name	Create A Google My business Profile

Define Technical Architecture:

You'll need to provide details about your business, such as the name, address, phone number, website, and category. Google will usually require you to verify your ownership of the business, which can be done through a postcard, phone call, or email. Keep your profile updated with accurate information, including your hours of operation, photos, posts, and reviews. Specify attributes like whether your business offers Wi-Fi, outdoor seating, accepts credit cards, and more. Upload high-quality images and videos that showcase your business. Encourage customers to leave reviews, and manage and respond to them through GMB.
